Pampers active fit nappy pants

premium protection™ active fit

FREQUENTLY ASKED QUESTIONS

Q From what age can you start using Pampers nappy pants?

A Pampers nappy pants are just like nappies in an easy to wear pant form. In the UK you can buy Pampers nappy pants for young babies from size 3, as soon as they start to wriggle.

Q When can I use Pampers nappy pants?

A Pampers nappy pants can be used at any time of the day, or night. They are perfect for daytime, playtime...in fact anytime!

Q Are Pampers nappy pants a potty training product?

A Pampers nappy pants can be used at any stage, even if your little one has not started potty training yet. You can try them as soon as little ones start wriggling around, and they have up to 12 hours of dryness just like a taped nappy. The pant design is just an easier nappy product to pull on.

Q What are the benefits of using Pampers nappy pants instead of taped nappies?

A

- ♥ Easier to pull on than taped nappies, especially with wriggly babies.
- ♥ Easy to remove with sides that tear down, without slowing down little ones.
- ♥ Stretchy waistband and all around comfortable fit for baby.
- ♥ 3 absorbing channels, designed to help distribute wetness evenly for up to 12 hours of dryness, just like taped nappies.

Q Are Pampers Active Fit nappy pants as absorbent as taped nappies?

A Yes, Pampers Active Fit nappy pants have 3 absorbing channels specially designed to help distribute wetness evenly for up to 12 hours of dryness, plus micro pearls absorbing and locking wetness away from baby's skin.

Q If a Pampers nappy pant leaks, should I try using a different size?

A Yes, making a change in style or size of nappy product often makes a big difference. As the weight recommendations on the pack are only a guide, it's possible that a slightly smaller size will keep the wetness in.
