Captivating Classrooms® from *iChild®*

**Captivating Classrooms®** from *iChild*®

Join Captivating Classrooms

iChild has developed this high-quality service for primary schools together with experienced teachers and leading subject specialists, such as the Geographical Association and the National Association for the Teaching of English (NATE), as well as Professor David Olusoga and scientist and award-winning children's author, Dr Mandy Hartley.

Many teachers indicated they would welcome further resources to support their teaching in some under-supported subjects and topics:

• **Black British history**

• **Geography (including Climate change)**

• **Science (including Evolution and Inheritance)**

• **Inspiring a love of reading to engage children in writing**

• **Fractions**

• **Computing (Algorithms and Debugging using unplugged activities)**

• **Art and Design**

• **Design and Technology**

iChild is now delighted to bring you fabulous new resources to support the teaching of these subjects at your school.

Geographical Association

NATE

These exclusive teaching resources are easy to use, save teachers time, enhance classroom engagement and support schools to implement a rich and diverse curriculum.

The resources are in the form of editable PowerPoint classroom presentations and come with PDF teacher notes to support lesson planning. There are also worksheets to support the brilliant activities and experiments, plus keyword flashcards and A4 posters for the learning wall. You'll also find personalisable certificates to award your pupils for completing each module.
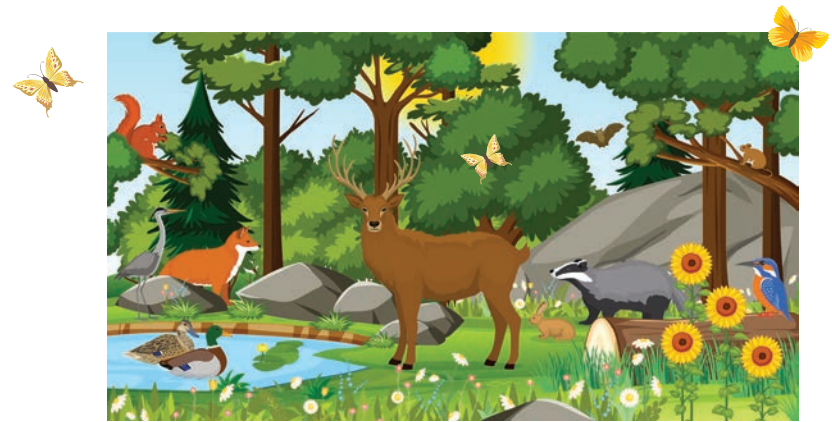

Discover excellent photography and high-quality designs throughout, plus exciting animations, which bring the real world into the classroom.

Here's what teachers are saying about Captivating Classrooms resources...

"iChild provided high quality 'Captivating Classrooms' resources to enhance our learning about the Tudor period. I liked that there was a clear focus on historical enquiry and history specific skills and ideas, such as continuity and change, outlined in the planning. The activities allowed for rigorous analysis and practise of skills, rather than just providing narrative content. These resources provided good development for me as a teacher to support our work towards widening our pupils' historical and geographical perspective by looking beyond the typical narrative of the big personalities of the Tudor monarchs. These resources allowed us to extend our understanding globally by linking with Africa and African people and engaged the children in a meaningful way."

PC, Year 5 Teacher

"I loved the way the lessons set the Romans in Britain in context and really developed our knowledge of that time and the way things happened. We were also reading Emperor's End which mentions the Ivory Bangle Lady and Emperor Severus, both came up in the lessons provided. It really helped the children connect with what they were learning. It gave them a much more thorough understanding of the history topic. Thank you for making it meaningful".

AF, Year 4 Teacher

"In English we were reading a text (Olive's Army by Emma Carroll) about a black GI stationed in Devon during World War 2. The resources provided gave us a great insight into what life would have been like for him. The materials on Lillian Bader and Ulric Cross were also useful because it showed that though they were determined and also lucky, others were not given roles they would have loved to have because of the colour of their skin.

At St Clement Danes School, we are looking forward to using units on Earth and Space and Evolution and Inheritance in the Spring Term".

CH, Year 6 Teacher

A word from our subject specialists...

"Many of you have requested resources to help teach **Black British history** in schools, so I was delighted when iChild asked me and my sister Yinka to work with their team to do exactly that.

Black history is a vital part of British history and so it is an important part of the history curriculum. This history helps us connect and understand Great Britain today".

"As part of iChild's new Captivating Classrooms service for schools, we've produced a series of lessons on Black British history for you to use in primary schools.

In the lessons, we search and discover different sources of historical evidence, which have been used to re-examine the past.

We take children on a journey, starting with the Romans... and moving on to the Tudors.... Stuarts... Early Georgians... Late Georgians... Victorians and into the 20th century with the First and Second World wars, and then the Windrush and the lasting impact in the 20th and 21st Centuries.

Please join us on this journey!"

Professor David Olusoga
Historian, author, presenter and BAFTA winning film-maker.

Dr Yinka Olusoga
Lecturer in Education,
University of Sheffield

Geographical Association

"Great geography teaching and learning in primary schools weaves pupils' experiences of their unique location with what exists in the wider world.

To build a rich geographical knowledge and understanding, pupils require opportunities to 'think like geographers': to challenge stereotypes, connect cause and effect, explore varied perspectives and stories and satisfy their curiosity".

"Primary teachers are the key holders, unlocking knowledge, skills, experiences and opportunities for practical application as well as theoretical synthesis. The Captivating Classrooms Steps for Learning have been carefully designed to support teachers in creating their own bespoke curriculum which will enable and empower students to think, act and behave like geographers".

Jon Cannel
Primary Curriculum Lead for the Geographical Association

"Evolution and Inheritance is one of the hardest topics within the science curriculum to teach. It is also the subject I get most requests for help with teaching.

As an exciting and important topic, I was therefore delighted to be asked to create resources to support teachers with this topic, as part of iChild's Captivating Classrooms for schools".

"We have created a fantastic platform for children where each lesson builds on the last, to help provide a step-by-step explanation of evolution, inheritance and natural selection in a way children will find engaging, fun and easy to understand.

These resources include teaching about DNA. The way DNA is introduced and explained to children within the lessons significantly helps their understanding. They find it easier to make sense of evolution by giving them a strong understanding of the vehicle which drives it.

There are hands-on experiments to get children to think scientifically and to have a go at being real scientists. This is perfect for increasing their science capital and the fun activities help to reinforce each lesson.

I hope by using these resources "Evolution and Inheritance" will become one of the easiest and most enjoyable science topics for you to teach!"

Dr Mandy Hartley
Scientist, award-winning author of 'The DNA Detectives' children's book series, and science teaching consultant.

"The Captivating Classrooms English resources have been created with the busy teacher in mind and offer the reassurance that the sound principles of the teaching sequence from reading to writing are at the heart of the recommended activities.

Teachers are encouraged to take the materials and adapt them as they see fit for the children in their classes, tailoring them to link with other subject areas and meet the needs of the children they teach."

Janet Gough
Primary Officer of the National Association
for the Teaching of English

NATE

"The Captivating Classrooms fractions resources are aimed to help children to deepen their understanding about fractions through playing games, using fractional language and stem sentences, and most of all having fun.

Each lesson is planned to move the learning on in small steps using a mixture of Concrete, Pictorial and Abstract representations. There are plenty of opportunities for children to develop their reasoning skills, with prompting example questions included to help children to deepen their thinking about fractions".

Lynne Greenwood
Primary Maths consultant, as well as a workgroup lead for NEHS
maths hub with Early Career teachers and an associate for MEI.

Captivating Classrooms Resources

The following Captivating Classrooms resources are available immediately once you subscribe. Resources cover primary years 1 to 6, as well as EYFS. More resource units will be released each month. Your school will also be able to contribute to ideas for new resources that we produce each year.
